

ELASTOFLEX SA P FR

SELF-ADHERED SBS (ELASTOMERIC) GRANULATED CAP SHEET

PRODUCT DESCRIPTION

Elastoflex SA P FR is a self-adhered Styrene-Butadiene-Styrene (SBS) granulated cap sheet, with fire retardant additives, for use in low-slope roofing. Elastoflex SA P FR is manufactured using Polyglass' patented ADESO® Dual-Compound Self-Adhered Technology. With this technology, a "true" elastomeric modified asphalt compound is applied to the top of the membrane and an aggressive self-adhesive proprietary compound is applied to the bottom. Elastoflex SA P FR is constructed with a tough non-woven polyester reinforcement that provides flexibility and dimensional stability as well as excellent tear and puncture resistance.

The top surface of Elastoflex SA P FR has a granular finish with multiple color options. Elastoflex SA P FR also features SEALLap® ULTRA, a granule-free side lap with self-adhesive compound and FASTLap®, granule free end lap. Each of these patented features provide for greater ease of applications as well as improved long-term performance.

Elastoflex SA P FR can be used as part of a Polyglass warranted multi-ply system with Elastoflex SA V, Elastoflex SA V Plus, or other top film-surfaced Polyglass base sheets to provide a cleaner application, improved application speed and removes the need for torches, hot asphalt or bonding adhesives on the job site.

TYPICAL APPLICATIONS

- Self-adhered cap sheet and flashing membrane on standard new construction and re-roofing applications.
- Self-adhered directly over an acceptable substrate or as part of a multi-ply system.
- Job sites with limited access for special installation equipment or where using a propane torch, hot asphalt or adhesives is undesirable.

FEATURES AND BENEFITS

- Excellent long-term adhesion.
- Application to multiple substrates and base/interply membranes.
- Non-woven polyester mat delivers excellent tear and puncture resistance.
- FASTLap granule free end lap provides faster, stronger seams.
- SEALLap ULTRA granule free selvage edge with self-adhesive compound for an immediate, long-term monolithic seam.

TECHNICAL DESCRIPTION*

Physical Properties	ASTM Method	ASTM Value	Typical Performance
Peak Load at 0°F [-18°C]	D5147	70 lbf/in [12.3 kN/m]	138 lbf/in [24.2 kN/m] - MD 88 lbf/in [15.4 kN/m] - XMD
Elongation at Peak Load at 0°F [-18°C]	D5147	20%	52% - MD 64% - XMD
Peak Load at 73°F [23°C]	D5147	50 lbf/in [8.8 kN/m]	80 lbf/in [14.0 kN/m] - MD 56 lbf/in [9.8 kN/m] - XMD
Elongation at Peak Load at 73°F [23°C]	D5147	35%	53% - MD 65% - XMD
Ultimate Elongation at 73°F [23°C]	D5147	38%	84% - MD 93% - XMD
Tear Strength at 73°F [23°C]	D5147	55 lbf [246 N]	129 lbf [574 N] - MD 83 lbf [369 N] - XMD
Dimensional Stability [maximum]	D5147	1%	0.3% - MD 0.6% - XMD
Low Temperature Flexibility [maximum]	D5147	0°F [-18°C]	pass
Compound Stability [maximum]	D5147	215°F [102°C]	pass
Granule Embedment [maximum loss]	D5147	2 g	1.5 g
Adhesion to Plywood [min at 40°F]	D1970	2.0 lbf/ft	4.7 lbf/ft
Adhesion to Plywood [min at 75°F]	D1970	12.0 lbf/ft	31.0 lbf/ft

*The properties in this table are "as manufactured" unless otherwise noted

PRODUCT DATA**

Net Coverage (Approx)..... 100 ft² (9.3 m²)
 Weight (Approx) 84 lbs (38 kg)
 Thickness (Nominal) 140 mils (3.5 mm)
 Roll Size 32'10" x 39 3/8" (10 m x 1 m)
 Rolls/Pallet..... 25

**All values are nominal at time of manufacturing

APPLICABLE STANDARDS

- ASTM D6164, Type I, Grade G
- UL Classified
- FM Approved
- ICC ESR-2018
- Florida Building Code
- Miami-Dade County Approved
- Texas Department of Insurance

ELASTOFLEX SA P FR

SELF-ADHERED SBS (ELASTOMERIC) GRANULATED CAP SHEET

AVAILABLE COLORS

Black (BL)	Buff (BU)	Chestnut (CH)
Grey Slate (SL)	Oak (OA)	White (WH)
Red Blend (RB)	Pine Green (PG)	Heather Blend (HB)
Weatherwood (WW)		

APPLICATION INSTRUCTIONS

Elastoflex SA P FR is intended to be used as the primary weathering surface in new or re-roof applications. Elastoflex SA P FR is to be applied as the uppermost layer of a multi-ply roof system over a compatible Polyglass base and/or interply membrane. Elastoflex SA P FR may also be applied directly to approved wood deck substrates of non-occupied spaces such as carports, sheds, canopies, etc.

For additional substrate requirements and information refer to "Suitable Substrates for Self-Adhered Membranes" Polyglass Technical Bulletin.

- Apply Elastoflex SA P FR membrane only in dry weather and when air and surface temperatures are 40°F (5°C) and rising.
- Apply over clean, dry, dust and debris-free substrates. Prime required substrates prior to application with PG 100 Fast-Drying Asphalt Primer or alternative ASTM D41 primers as approved by Polyglass.
- All substrates shall be designed with proper expansion devices.
- Wood decks shall have all joints cross blocked and/or properly supported.
- Installation of Elastoflex SA P FR should not adversely affect the ventilation of existing construction.
- Do not apply directly to existing shingles or other unacceptable roof coverings.
- While installing Elastoflex SA P FR:
 1. Start at the low point of the roof.
 2. Unroll the material and allow to relax.
 3. Start by removing the first 18–24" of release film.
 4. Press the membrane into place with firm and even pressure. Roll the edges with a silicone hand roller to ensure complete adhesion.
 5. Gradually remove the remaining release film applying pressure from the center to the edges as you go.
 6. Position successive rolls using the 5" FASTlap at the endlap and 3" SEAllap granule free side lap. Ensure a watertight seal.
 7. After installation of the entire roof surface, roll with an 75# split-face linoleum roller. Take care on sloped roofs by securing the roller and applicator with the appropriate safety equipment
- Details and flashing may be installed with a hot air welder or with PG 500 Roof Cement or PolyPlus 50 Premium Modified Wet/Dry Cement. Refer to manufacturer's published details for proper design and installation of detail work.
- For detailed drawings and recommended installation procedures of typical roof segments, such as drip edge and T-joint conditions, please refer to our website at, www.polyglass.us.

MANUFACTURING FACILITIES

- Fernley, NV
- Hazleton, PA
- Waco, TX
- Winter Haven, FL
