### SECTION 4 FIRST AID MEASURES

**Eyes:** Immediately flush eyes with water while lifting the upper and lower lids. Get medical attention if irritation persists.

**Skin:** Remove contaminated clothing. Wash skin thoroughly with soap and water. If irritation develops, get medical attention. Launder clothing before re-use.

**Inhalation:** If symptoms develop, remove victim to fresh air. If symptoms develop, get medical attention.

**Ingestion:** If conscious, rinse mouth with water. Never give anything by mouth to a person who is unconscious or convulsing. If large amount is swallowed or gastrointestinal effects develop, get medical attention.

**Most important symptoms/effects, acute and delayed:** Causes mild eye irritation. Prolonged contact may cause skin irritation and dryness. Inhalation of vapors may cause respiratory irritation. Ingestion may cause nausea, vomiting and diarrhea.

**Indication of immediate medical attention and special treatment, if necessary:** Immediate medical attention is not normally required.

### SECTION 5 FIRE FIGHTING MEASURES

**Extinguishing Media:** Use any media appropriate for the surrounding fire. Cool fire exposed containers with water.

**Special Protective Equipment and Precautions for Fire-fighters:** Firefighters should wear full emergency equipment and NIOSH approved positive pressure self-contained breathing apparatus. Do not allow run-off from firefighting to enter drains or water courses.

**Specific Hazards Arising from the Chemical:** This product is an aqueous mixture that will not burn until all water has evaporated. Residue will burn after the fire has evaporated. Combustion products may include oxides of carbon and zinc.

### SECTION 6 ACCIDENTAL RELEASE MEASURES

**Personal Precautions, Protective Equipment, and Emergency Procedures:** Wear appropriate protective clothing to avoid eye and skin contact. Collect spilled material with inert material and place into a closable container for disposal. Prevent runoff to storm sewers and ditches leading to natural waterways.

**Environmental precautions:** Avoid release to the environment. Report releases as required by local, state and federal authorities.

**Methods and Materials for Containment and Cleaning Up:** Wipe up and place into a closable container for disposal.

### SECTION 7 HANDLING and STORAGE

**Precautions for Safe Handling:** Avoid contact with the eyes, skin and clothing. Wear protective clothing and equipment as described in Section 8. Use with adequate ventilation. Wash thoroughly with soap and water after handling. Keep containers closed when not in use.

Empty containers retain product residues can be hazardous. Follow all SDS precautions when handling empty containers.

**Conditions for Safe Storage, Including any Incompatibilities:** Store in a dry, well-ventilated area. Protect from physical damage. Store in original container; keep tightly closed. Rotate stock, using older materials first. Do not reuse container for other purposes. Do not store in freezing areas. Keep above 40 °F, but less than 100 °F. Do not store in direct sunlight.

## SECTION 8 EXPOSURE CONTROLS and PERSONAL PROTECTION

**Exposure Guidelines:**

INGREDIENTS	EXPOSURE LIMITS
Acrylic Polymer	None Established
Calcium Carbonate	5 mg/m <sup>3</sup> TWA OSHA PEL (respirable fraction) 15 mg/m <sup>3</sup> TWA OSHA PEL (total dust)
Titanium Dioxide	15 mg/m <sup>3</sup> TWA OSHA PEL (total dust) 10 mg/m <sup>3</sup> TWA ACGIH TLV
Zinc Oxide	5 mg/m <sup>3</sup> TWA OSHA PEL (respirable fraction) 15 mg/m <sup>3</sup> TWA OSHA PEL (total dust) 2 mg/m <sup>3</sup> TWA , 10 mg/m <sup>3</sup> STEL (respirable) ACGIH TLV
Crystalline Silica, Quartz	$\frac{10 \text{ mg/m}^3}{\% \text{ Silica} + 2}$ TWA OSHA PEL (respirable fraction) 0.025 mg/m <sup>3</sup> TWA ACGIH TLV (respirable fraction)
Benzophenone	0.5 mg/m <sup>3</sup> TWA AIHA WEEL

**Appropriate Engineering Controls:** Use with adequate ventilation to maintain exposures below the occupational exposure limits.

**Respiratory Protection:** If the exposure limits are exceeded a NIOSH approved respirator appropriate for the form and concentration of the contaminants should be used. Selection and use of respiratory equipment must be in accordance with OSHA 1910.134 and good industrial hygiene practice.

**Gloves:** Rubber or other impervious gloves are recommended to prevent prolonged skin contact.

**Eye Protection:** Chemical safety goggles should be worn if splashing is possible.

**Other Protective Equipment:** Impervious clothing as needed to avoid contact.
