FORTRIX™

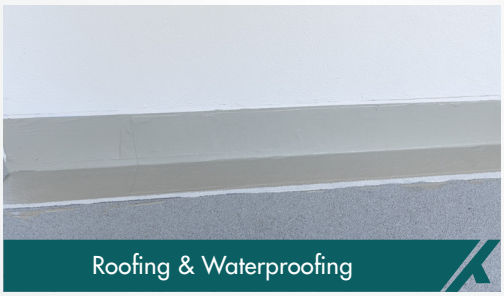

LIQUID-APPLIED PMMA WATERPROOFING SYSTEM

FORTRIX™ is a high-performance polymethyl methacrylate (PMMA) system for roofing and waterproofing applications where detailing complexity, exposure conditions, and project demands require a durable, fully reinforced liquid-applied solution.

Seamless, reinforced PMMA waterproofing solutions are engineered to address complex details, minimize disruption, and protect critical building assets across roofing, balconies, terraces, plaza decks, and other waterproofing applications.

REINFORCED PROTECTION FOR COMPLEX APPLICATIONS

Roofing & Waterproofing

Critical Details

WHY FORTRIX?

- Seamless, reinforced membrane system
- Conforms to transitions, penetrations, and details
- Walkable in approximately 30-45 minutes
- Supports phased construction, reduces downtime
- Helps accommodate normal substrate movement
- Designed for long-term waterproofing performance

FORTRIX™

LIQUID-APPLIED PMMA WATERPROOFING SYSTEM

HOW THE SYSTEM COMES TOGETHER

FORTRIX™ brings together specialized substrate primers, reinforced resin membranes, and system accessories into a seamless assembly for roofing and waterproofing applications.

SYSTEM COMPONENTS

SUBSTRATE PRIMERS

FORTRIX FP	**Flexible primer** for compatible roofing and waterproofing substrates.
FORTRIX DP	**Deck primer** for concrete and wood substrates.
FORTRIX EP	**Epoxy primer** for metal, concrete, and wood substrates.

WATERPROOFING RESINS

FORTRIX PMMA — **Fast-curing PMMA field resin** for reinforced roofing and waterproofing assemblies.
- Creates a seamless, reinforced waterproofing membrane
- Supports rapid return-to-service and long-term performance

FORTRIX FG — **PMMA flashing grade resin** for penetrations, transitions, and critical details.
- Conforms to complex geometries
- Helps eliminate common leak pathways

SYSTEM ACCESSORIES

FORTRIX Catalyst	**Reactive curing agent** for FORTRIX PMMA products.
FORTRIX Fleece	**Polyester reinforcement** for enhanced membrane performance.
FORTRIX C-R	**Cleaner and reactivator** for repairs, transitions, and recoating.
